

## Introducing the #1 selling removable self-adhesive wallpaper fabric?

Photo Tex™ is a peel & stick, multi-US patented, adhesive material made of 100% polyester fabric. It can be installed on almost any surface and remain adhered in all-weather conditions. Its dependable adhesive can be removed and reused multiple times without any alteration or loss of StikAbility™. Our fabric material is non-toxic, green and phthalates free.

## Photo Tex™ patented adhesive has – True StikAbility™!

Upon removal, Photo Tex insures a 99% chance that its adhesive will not leave a sticky residue. We believe we are the only fabric material that will not shrink, curl, rip or wrinkle with climate or temperature changes. Photo Tex (indoors) does not have a time limit when it needs to be removed in order to prevent damage. (Outdoor longevity varies based on ink type and weather conditions. We suggest liquid laminating in outdoor environments when using our solvent versions.)

## Over 200,000 rolls sold!

Photo Tex has the ability to wrap around wall corners or poles and can even be placed on ceilings. A distinct advantage is that you can bleed to the edges and not worry about edge curling. You can actually use paint, crayons or even magic markers without seeping through the fabric. You can easily make custom cut-outs by (contour-cut) kiss-cutting. So, stick it for a day or for a decade!

## Worldwide installations?

Macy's, Coke Cola, Pepsi, Anheuser Busch, Coors-Miller, McDonald's, Victoria's Secret, Verizon, Cricket, and Harley Davison – just to name a few. It has been used in Stadiums (NFL,NHL,NASCAR,NCAA,PGA...), photography (reproduce any picture, create sports actions shots), reproduce artwork, wall murals, wallpaper borders, corporate advertising, political campaigns, POP , posters , ads, elevators door coverings, race car stickers, window signs and vehicles !
