GX PRO SERIES CUTTERS

GX-300 | GX-400 | GX-500 | GX-640

Astounding value. Outstanding performance.

3-year warranty with registration

Speed. Power. Precision. The Roland GX Pro lets you shift your graphics business into high gear. Powered by digital servomotors, these professional grade vinyl cutters achieve maximum accuracy and cutting speeds up to 33-inches per second with up to 350 grams of pressure. Vehicle graphics, window tint, signage, labels, stencils and even pinstriping come out crisp and clean.

These professional-grade cutters also include an optical registration system, making it fast and easy to contour cut full color pre-printed graphics. The ability to

Roland CutStudio® software included

mate an existing printer with the GX Pro gives you a powerful and cost-effective print/cut solution. This feature lets you blow the doors off the competition with popular jobs like heat-transfer graphics for T-shirts, full-color POP displays, and vehicle wraps.

GX-640 HIGHLIGHTS

The GX-640 64" cutter represents not only the widest, but also our most advanced cutter to date. Its size makes it ideal for cutting 60" films for windshields, bumpers and hoods. Mechanical resolution has been improved to 3.5 microns. Features include an EXTEND mode that expands cutting width to 65" and a HEAVY mode that enables handling large, heavy rolls of media, including sand blast materials.

DESKTOP SIGNMAKER

CAMM-1 SERVO GX-24

The perfect companion for print-and-cut jobs.

2-year warranty with registration

Look under the hood of the Roland CAMM-1 SERVO GX-24 vinyl cutter and you'll find an advanced digital servomotor that ensures accuracy when cutting anything from reflective vinyl and paint mask, to twill, heat transfer and sandblast material. Perfect for print-and-cut jobs with its optical registration system that accurately aligns pre-printed material for contour cutting, and built-in curve-smoothing function that ensures precision cutting even at top speeds of up to 20-inches per second. Simply connect your computer to the USB interface, pan through functions on the easy-to-read LCD screen, and use the included CutStudio® drawing software to create incredible graphics.

Print then Cut

For high volume printing and precision cutting, simply pair a Roland GX cutter with a VersaArt® or SOLJET® series inkjet printer. Roland VersaWorks ensures full integration and Quadralign™ automatically aligns the cutting path and compensates for skew and distortion.

STIKA® DESKTOP DESIGN CUTTERS

SV-8 | SV-12 | SV-15

The ultimate portable vinyl cutters.

 Roland CutStudio® software included
1-year warranty

Easy to use. Affordable. Versatile. Roland STIKA design cutters let small offices, schools and hobbyists produce a wide range of custom graphics. The STIKA makes it easy to create everything from POP displays and iron-on graphics for T-shirts to vehicle graphics.

The STIKA also makes a cost-effective print/cut solution. Just print registration marks on your graphics with your desktop printer. Load the printed graphics into the cutter. And set the position of the registration marks using the STIKA driver. Making professional-looking graphics with the STIKA is a snap.

REV UP YOUR PROJECTS WITH PROFESSIONAL-QUALITY SOFTWARE TOOLS.

Roland cutters include Roland CutStudio® software. CutStudio lets designers quickly and easily create graphics, position text on curves, enlarge, reduce, re-position, rotate and mirror images. Designs can be imported in BMP, JPG, STX, AI, and EPS file formats.

CutStudio includes a Windows® printer driver, a plug-in for Adobe® Illustrator®

9 to CS6, a plug-in for CorelDRAW® 10 to X6, and a plug-in for Adobe Illustrator 9 to CS6 in the Macintosh OS 9/X environment. Roland cutters also work with all popular sign making software for maximum flexibility.

Roland VersaWorks® is a powerful RIP software developed by Roland engineers for the company's inkjet technology that's built upon the genuine Adobe® PostScript® CPSI™ RIP engine. If you

already own a Roland inkjet device, your VersaWorks® RIP Software

features an efficient graphical user interface that lets you maximize Roland inkjet production by allowing offline cutting.
